# Galicia as ICT provider

**1st european region to define a network of integrated smartcities working colaboratively in real time**

- **the “Galician commitment” is a multimillion investment project to become the 1st smart european region**
- single city roaming services for citizens:
  - transport, parking, tourism, enhanced reality, social care, smartshopping all integrated over a diverse landscape of big cities and small councils
  - with an innovation hub created by private enterprises definining smart private services over the public smartcity data and infrastructure

# Galicia as a place to invest in ...

**While Risk Capital investment has decreased Galician universities continue creating state-of-the-art startups on:**

- facial recognition
- video recognition
- interactive video
- smart shopping
- medical devices
- sport technologies ...
